

H-1B Employer Data Hub

The H-1B program allows employers in the United States to temporarily employ foreign workers in occupations that require the theoretical and practical application of a body of highly specialized knowledge and a bachelor's degree or higher in the specific specialty, or its equivalent.

The H-1B Employer Data Hub includes data from fiscal year 2009 through the first quarter of fiscal year 2019 on employers who have submitted petitions to employ H-1B nonimmigrant workers. Data can be queried by fiscal year, employer name, city, state, zip code, and NAICS code. The H-1B Employer Data Hub has data on the first decisions USCIS makes on petitions for initial and continuing employment. It identifies employers by the last four digits of their tax identification number. You can download annual and query-specific data in .csv format. For more information on the data, visit the Understanding Our H-1B Employer Data Hub page.

Download complete files for individual fiscal years on the H-1B Employer Data Hub Files page.
